- Demand for Machine Tools bottomed out in $1 Q$ and is rising, resulting in higher sales and earnings.
- Industrial Tools \& Equipment posted lower sales and earnings, as production of automobiles and semiconductor manufacturing systems that began to pick up in 2 Q was not fully translated into higher demand for industrial tools and equipment and expendables in real terms.

- Sales to the U.S. and China saw solid growth especially for construction machinery and auto production equipment. Machine tool-related sales were weak (down 13\% YOY) on lower demand for capital equipment from Thailand and EMS
- Sales of industrial tools and equipment to China, Thailand, Indonesia, Europe and U.S. saw solid growth, especially for measuring equipment and cutting tools (up 17\% year on year)

- HEM saw sales growth in kitchen equipment on the back of a rise in housing starts. This, combined with solid demand for solar power generation systems (industrial) and higher demand for air conditioning equipment induced by severe summer heat resulted in higher sales/earnings.
- Home Product's profits were down due to deteriorating gross margins caused by the weaker Yen and the rising oil price, in addition to an increase in expenses.
