Net sales decreased -5.0\% YoY due to slowing in domestic and overseas capital investment trends. Gross profit decreased by $-3.7 \%$ due to the impact of lower sales, although the rate increased by 0.2ppt YoY, mainly due to an increase in the share of net sales of consumer goods. On the other hand, operating profit decreased by $40.2 \%$ YoY due to a decrease in gross profit, an increase in depreciation and amortization and other expenses associated with the introduction of the SAP ERP system that is a growth investment, and an increase in personnel expenses as an investment in human capital.

- Overseas Machine Tools
- Other

Domestic Production Equipment Business: Sales of machine tools, etc. were weak, due to the lack of new investment activity in the semiconductor and automobile industries. Overall, sales of consumables such as industrial tools were also down compared to the same period of the previous year. Sales of infrastructure-related equipment, etc. were strong due to urban redevelopment and public infrastructure renewal demand. On the other hand, sales of material handling equipment were down compared to the same period of the previous year due to a lull in EC logistics facilities.

Overseas Production Equipment Business: Overall sales in the North America Regional Headquarters were down compared to the same period of the previous year due to sluggish capital investment, but sales in Mexico were strong in response to the relocation of production bases from other regions. Sales to EMS enterprises declined in the Taiwan Regional Headquarters, while sales in the China Regional Headquarters were down compared to the same period of the previous year due to sluggish sales to export-oriented industries. In the ASEAN Regional Headquarters, Indonesia and India posted strong sales mainly in the automobile and motorcycle fields, but overall results were down compared to the same period of the previous year mainly due to the delayed recovery in demand for semiconductors.

Production Equipment Segment Quarterly Sales Trend (Domestic/Overseas)

Consumer Goods Segment Overview (Building Materials/Home Products)

- Building Materials Business: Amid stagnant demand, sales of bathroom appliances, solar power generation systems, storage batteries, etc. remained strong due to proposals of high-value-added products in response to consumers' desire to reduce spending due to soaring utility costs. Proposals for facility renovations that combine environmental products and installation were also successful in helping SMEs respond to carbon neutrality. In particular, we are aggressively developing proposals for sets of solar power generation and storage batteries for self-consumption.
-Home Products Business: Results are down YoY as the demand arising from "staying home" due to refraining from going out and the expansion of remote working having run its course, soaring prices of raw materials, electricity, and gas, as well as the weak yen, has reduced consumer appetite for durable consumer goods, although there were also record hot temperatures nationwide, so sales of electric fans, circulators, clothing with air conditioning fans, and other private-brand products with unique value-added features that meet consumer needs remained strong.

The announced full-year plan for FY3/24 planned for sales to increase but profits to decrease as of May 2023, with depreciation expected due to the acceleration of growth investment, but it was revised to the above in September 2023 as the recovery in capital investment in the Japanese domestic market is delayed, and the economic momentum in overseas markets, China in particular, is weak, and a cautious attitude toward capital investment is expected to continue.

# AGENDA 

I. FY3/24 (Q2) Financial Highlights
II. Earnings Forecast for FY3/24, Medium-Term Management Plan
III. Shareholder Returns

## Reason for change:

The shareholder returns policy is specified in terms of the consolidated payout ratio, however, because the current Medium-Term Management Plan incorporates an increase in depreciation and amortization due to business investments and capital expenditures, and there is a possibility that shareholder returns will be at an inadequate level based on the progress of the investment plan and a short-term downturn in earnings, we have therefore revised our shareholder return policy as follows to ensure stable and continuous shareholder returns.

| Before <br> change | Yamazen Corporation's basic policy has been to return profits to shareholders in consideration of profit levels, based on the <br> establishment of a stable financial base and improvement of profitability, and to maintain stable dividends to shareholders <br> with a target payout ratio of 30\%. |
| :---: | :--- |
| After change | Yamazen Corporation has positioned return of profits to shareholders as a priority issue for management. Our basic policy is <br> now to distribute profits in line with business performance, while balancing investment for sustainable growth with <br> enhancement of corporate value and financial soundness to prepare for diverse risks, with the annual dividend amount set <br> at a consolidated dividend payout ratio of 40\% (performance-linked profit distribution indicator) or a dividend on <br> equity ratio (DOE) of 3.5\% (stable profit distribution indicator), whichever is higher. <br> Yamazen Corporation will also flexibly implement share repurchasing in consideration of timing and financial position in <br> order to provide additional returns to shareholders and improve capital efficiency. |

Applicable period: FY3/24 and FY3/25
(During the period of the Medium-Term Management Plan "CROSSING YAMAZEN 2024")

FY3/23: Paid an interim and year-end dividend of 20 yen per share each, for an annual dividend of 40 yen per share.
> FY3/24: Plan to pay an interim dividend of 20 yen per share and a year-end dividend of 29 yen per share, for an annual dividend of 49 yen per share.
